

# International Activities

## JS has established International Affairs Office.

Japan Sewage Works Agency (JS) has accumulated technical and engineering know-how and management skills about sewerage based on our domestic and international activities in Japan. JS established International Affairs Office in 2011. JS will focus on not only international cooperation, such as experts dispatch, but also international support activities for municipalities and private companies in Japan.

### Project Support for World's Water-Related Infrastructures

- Improvements, developments and evaluations of technologies

JS will assist the private companies to develop or improve sewerage technologies through the joint research projects so that the private companies can adapt them abroad. Furthermore, JS will evaluate the private sector developed technologies in order to enhance their worth from a viewpoint of a public sector .

### Support for World's Water-Related Business Market Gain

- International Standardizations

JS has established a number of domestic standards for sewerage. JS will focus on supporting international standardization activities of sewerage technologies on the basis of our domestic standards and standardization know-how.

### Technical Support and Training for Engineers and Operators

- Technical Support for your countries through dispatching our experts.

JS has dispatched more than 80 experts based on the requirements of the Japan International Cooperation Agency (JICA) for your countries. JS will keep this international cooperation activities, and dispatch trainers to the group training course sponsored by JICA and municipalities in Japan.
