

Type 3 Screw Press Dehydrator

Principle and Structure

Type 3 Screw Press Dehydrator

Principle and Structure

Thickening Part

- ◎ Constant flow treatment
- ◎ Control of screw speed produces highly concentrated sludge

【Stable treatment】
【concentration adjustment + high concentration】

Press-in Part

- ◎ Press highly concentrated sludge in dewatering part

【High filling rate】

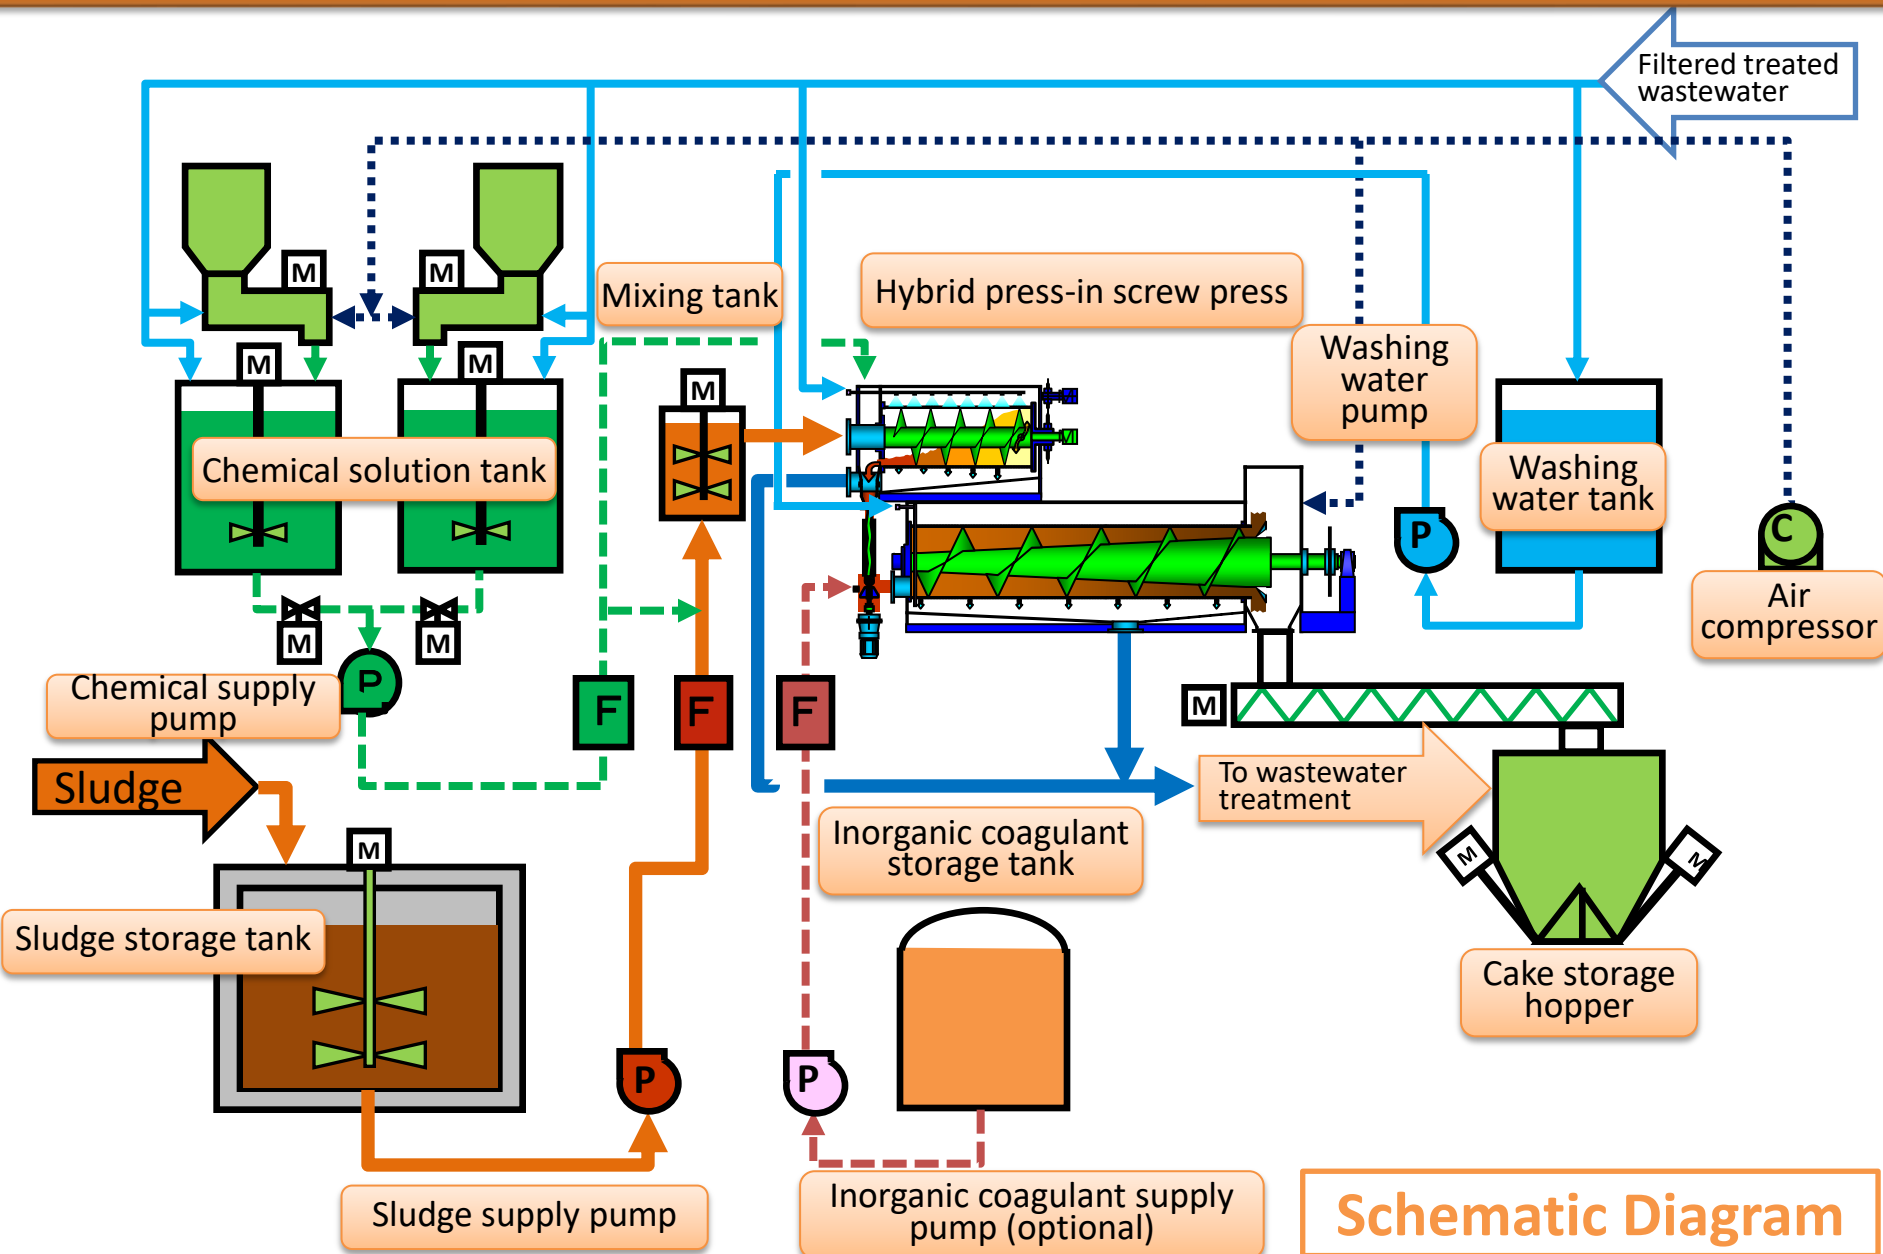

Dewatering Part

- ◎ Enhance dewatering of highly concentrated sludge

【long dewatering time】

Low water content and improvement of operation stability

Type 3 Screw Press Dehydrator
