Japan Sewage Works Agency

**Japan Sewage Works Agency (JS) Signed a Memorandum of Understanding with  
the University of Calgary (the University of Calgary)**

JS and the University of Calgary signed a Memorandum of Understanding (MOU) to establish a long-term cooperative relationship to strengthen global partnerships in sewage works.

The University of Calgary (UCalgary) is a research-intensive university in Alberta, Canada. It is a top research university and one of the highest-ranked universities of its age. Founded in 1966, its 35,000 students experience an innovative learning environment rich in research, hands-on experiences, and entrepreneurial thinking.

UCalgary operates ACWA (Advancing Canadian Water Assets), an initiative that supports research and development, knowledge transfer, de-risking, and piloting of leading-edge water, stormwater, and wastewater treatment technologies. ACWA is an initiative of the Urban Alliance, a strategic partnership between The City of Calgary and the University of Calgary. ACWA's mission is to translate today's water treatment research into tomorrow's innovative technologies to recover resources, improve treatment efficiency, and protect the environment for the benefit of local and global communities, which is very much in line with JS's core philosophy.

The MOU between JS and UCalgary will mobilize both parties' knowledge and creativity to solve international water issues.
